Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The claims define a sector shaped gap between a first cushion element located for first ground heel contact and a second element and both elements being located proximate a load distribution plate. The term "sector-shaped" has been treated as being defined as "part of a circle bounded by any two radii and the arc included between them" as defined by Webster's New World Dictionary. It is noted that Patent 6516540 shows a sector shaped space between portions 36 and 38 of figure 17, however this is not considered to be a gap between two elements because portions 36 and 38 are portions of a single element 18a and therefore do not read on the claimed structure. Furthermore, there does not appear to be a load distribution plate in Patent 6516540 as claimed by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

1. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
